Solution

Integrated public-service technology for health screening, telemedicine support, soil testing, farmer advisory and essential vending.

Unite Microsystems Pvt. Ltd.

- Smart Health Kiosk
- Smart Agritech Soil Testing Kiosk
- Health & Agri Vending Machine
- Delhi, Patna, Noida, Bihar, MCR and serviceable locations

## Smart Health Kiosk Overview

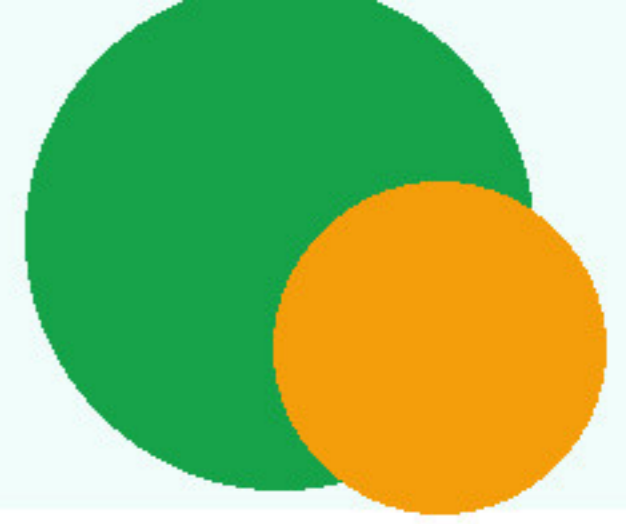

For basic health screening, patient registration, telemedicine support and report workflow.

### Health modules

- BP monitoring support
- SpO2 / oxygen monitoring support
- Temperature and pulse reading
- Patient registration and health records
- Telemedicine consultation workflow

### Important note

- Supports screening and consultation workflow. It is not a replacement for qualified medical diagnosis or emergency care.

## Smart Agritech Soil Testing Overview

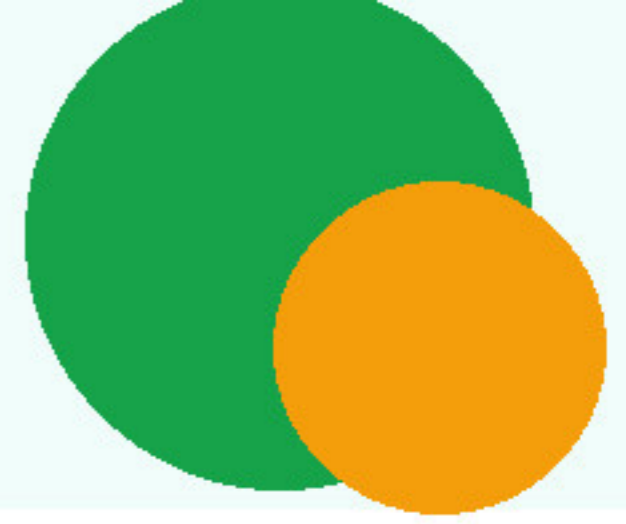

For farmer registration, soil parameter testing support, soil reports and advisory workflow.

### Configurable soil parameters

- Soil pH
- Soil moisture
- Electrical conductivity
- NPK support
- Temperature
- Optional / future-ready parameters as per selected modules

### Use cases

- Panchayat service center
- Farmer advisory center
- Agriculture extension program
- NGO / CSR farming project

## Health & Agri Vending Machine

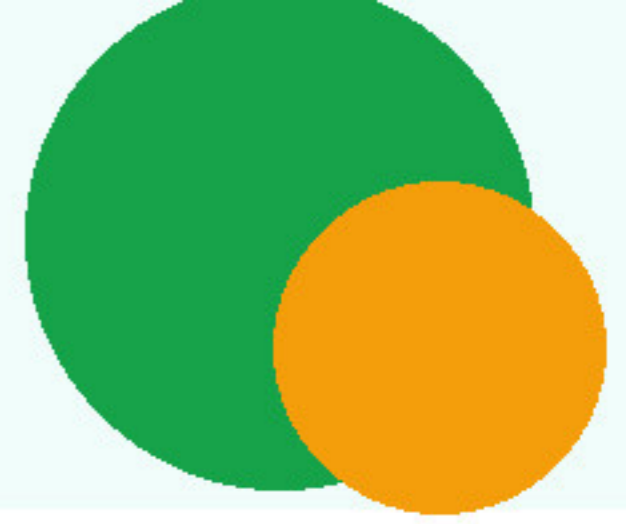

For public access to permitted health, hygiene, wellness and agriculture support products.

### Health products

- ORS, masks, sanitizer, first-aid items, hygiene essentials and OTC wellness products as permitted.

### Agri products

- Soil kits, sample bags, farmer booklets, crop advisory material and permitted packaged agri essentials.

## Package Comparison

Choose a package based on location, service objective and user group.

### Basic Health / Telemedicine Kiosk

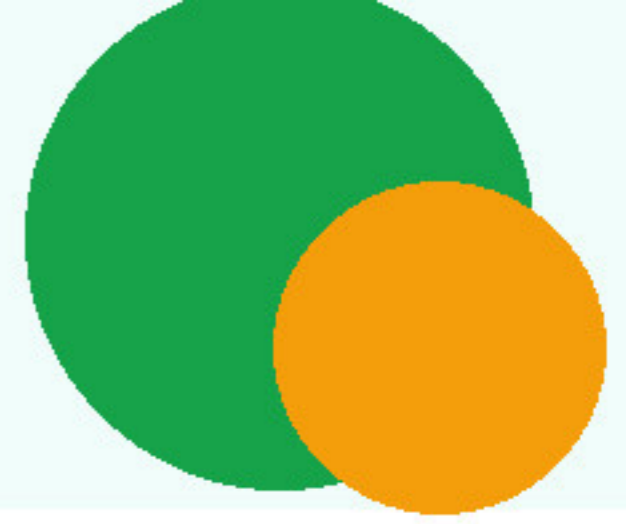

- Best for clinics, villages, CSR camps, schools and workplaces.

### Soil Testing / Farmer Advisory Kiosk

- Best for panchayats, agriculture centers, NGOs and farmer service projects.

### Complete Health + Agri + Vending Kiosk

- Best for integrated rural service centers and public-service deployments.

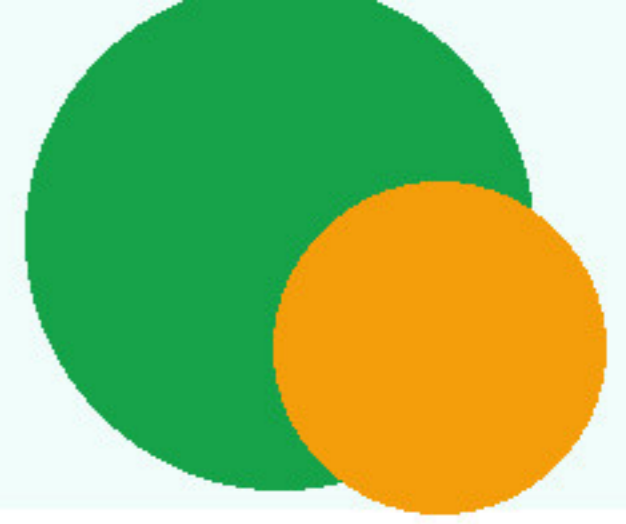

## Installation & Support Process

A practical deployment flow from requirement to service delivery.

### Process

- 1. Choose solution type
- 2. Requirement discussion
- 3. Product configuration
- 4. Installation and setup
- 5. Operator training
- 6. Service delivery
- 7. Dashboard and support

## Enquiry & Contact

Request demo, quotation or kiosk package recommendation.
